

The CleanTuesday association aims to develop the Clean Technologies areas in France and Europe.

### Objectives

- To develop an ecosystem about Clean Technologies with all the actors implied: researchers, start up, great companies, other associations, students, local authorities, medias, bloggers, investors and international partners.
- To promote the development of an innovation culture based on the model of what exists yet in the NTIC community.

### The actions

To create physical and virtual spaces dedicated to meet up (bar camps, blogs, wiki...) which favor creativity and knowledge sharing, in order to :

- Grow cooperation and networking between the actors of the clean technologies sector
- Inform and work with international (Europe, US, Israel, Golf)
- Create a media link between all the actors (articles, green paper etc.)
